

A Brand New Series of "Must-Attend" Professional Webinars for Fall 2009!

LMC@The Forefront is bringing an exciting lineup for Fall 2009. These popular live, web-delivered professional development workshops provide an excellent and affordable opportunity to explore critical issues in school library and education practices with esteemed authors and education practice innovators. Each Webinar will include ample time for questions and exchanging thoughts during the Q&A.

Session I

Deborah Ford: Books & Boys

10/1/09 at 3:30-4:45PM (EDT)

Discover books boys will read; books that are funny, action packed, trivia filled or gross. Learn about strategies that will get them reading and writing with enthusiasm as well. You'll receive a handout of the books.

Session II

Doug Johnson: Intellectual Freedom in the 21st Century

10/6/09 at 3:30-4:45PM (EDT)

Learn how the improper use of commercial filters and poor school policies can lead to both students and staff being unable to access quality information and tools online. And learn what YOU as a library media specialist can do about it.

Session III

Michele Gorman: Graphic Novels for Kids

10/8/09 at 3:30-4:45PM (EDT)

Hear the answers to all your graphic novels questions from the author of *Getting Graphic! Using Graphic Novels to Promote Literacy with Preteens and Teens*, the newly released *Getting Graphic! Comics for Kids*, and the "Getting Graphic" columnist for LIBRARY MEDIA CONNECTION.

Session IV

Michele Gorman: Graphic Novels for Teens

10/15/09 at 3:30-4:45PM (EDT)

Find out more about why the graphic novel format is so good for teens, including an in-depth look at how (and why) graphic novels and comics are turning a new generation of anti-reading teens into readers!

Session V

Laura Robinson: Super3 Discovery Learning

10/22/09 at 3:30-4:45PM (EDT)

Discover practical ways to weave Super3 thinking into some familiar primary school assignments. Based on the original six steps of the Big6, the Super3 uses Plan-Do-Review to help very young children think about what they need to do in an assignment, how they'll do the work, and finally to reflect on their work.

Session VI

Mike Eisenberg: Big6 Basics: Building Research Skills Using Technology and the Big6

10/29/09 at 3:30-4:45PM (EDT)

Discover how the Big6 Skills correlates with 21st Century Skills learning in your schools. Big6 integrates information search and use skills along with technology tools in a systematic process to help students find, use, apply, and evaluate information to specific needs and tasks.

Session VII

Patricia Conover: Technology Projects: Books, Boxes, & All Things Fun to Make

11/3/09 at 3:30-4:45PM (EDT)

This fast-paced Webinar demonstrates ten projects you and your students can create using PowerPoint. Learn to make folio folders, pinwheels, pop-up books, building blocks, and more. Projects can be easily adapted to different curricula, standards, and age groups. Teach students to utilize technology to demonstrate what they have learned and have fun doing it!

Session VIII

David Warlick: Personal Learning Networks

11/12/09 at 3:30-4:45PM (EDT)

Find out about the emerging technologies and techniques that educator-learners are beginning to utilize in order to form Personal Learning Networks (PLNs)—communities of educators and dynamic content that help them do their jobs. Explore steps and strategies for encouraging and supporting faculty in forming and maintaining their own PLNs.

PRICING:

\$49 per site for 1 attendee \$99 per site for 4-19 attendees

\$69 per site for 2-3 attendees \$129 per site for 20-49 attendees
