New Titles from Greenhaven Press®

Take Global Viewpoints to the next level

NEW SERIES! Global interdependence has become an undeniable reality. As technology makes the world more accessible, it is increasingly important for students and other readers to develop a wider picture on social issues as well as political, environmental and health topics of worldwide significance.

Building on the success of its flagship series, *Opposing Viewpoints*, Greenhaven Press® has created the *Global Viewpoints* series to examine a range of current and often controversial topics from a variety of international perspectives.

The result is a valuable teaching resource for instructors and media specialists seeking to supplement course material and for others wanting to understand current issues better.

Each anthology delivers contemporary views on the featured issue — with the majority of the material reflecting stances of countries other than the United States.

PANORAMIC PERSPECTIVES

Drugs, famine, immigration — a broad, international treatment is essential to a well-rounded understanding of these vital issues. Students from high school through college, as well as general readers, can use *Global Viewpoints* to compare and contrast unique perspectives while appreciating the interconnection that global priorities bring to all nations and cultures.
